

Dear Dr. Small,

I wanted to wait until I was "finished" (even though, as you said ours could be a long-term relationship) but it looks like my eyes need to wait until the summer.

So, I'm taking this moment to let you know just how much you have changed my life, my look, myself. I am a different person. It's hard to believe how a tummy tuck could make such a difference. My clothes fit so much better and I feel better without

clothes. You did such a wonderful job - and I have shown many, many people.

You put that there.

Thank you so much!

Everyone is amazed and a little jealous. You were wonderful - I have recommended you to so many people. Here's hoping they have the courage to follow through.

I am trying my best to keep it fit and flat - without doing any damage - a fine line
